Something along these lines: SELECT * FROM table WHERE columnA = 1 OR columnB > 1 But only the columnA part? Like it can't be the case that columnA and columnB both have the same data and are therefore always displayed on the results? A: SELECT * FROM table WHERE columnA = 1 OR columnB > 1 Will give you all records in the table where columnA has 1 or columnB is greater than 1. Are you looking for anything other than that? If so, one way to do it would be to use something like this: SELECT * FROM table WHERE columnA = 1 OR columnB > 1 AND (columnC ='some_val' OR columnD >'some_val') The exact syntax will vary depending on your database, but you should be able to find it online.
